

Full Stack PHP Developer at Paybis.com, Online Digital and Crypto exchange

We are looking for talented and motivated developers to join our team at Paybis who can hit the ground running and take our product to the next level, as we scale up and develop our business in new markets.

You will join a rapidly growing FinTech company with more than 4 years online presence worldwide. The team is currently working on developing scalable API services, building new systems and supporting new lines of business, all while improving the stability, security and performance of our core platform.

Your day-to-day will vary between different components of our product, so this role requires technical flexibility and desire to learn new skills quickly. We work primarily with Symfony, Yii and Vue.js frameworks backed by MySQL databases, with REST and GraphQL APIs.

Your role

- Design, code, document and test software.
- Contribute to the design and architecture of our platform.
- Perform code reviews and look after our code quality.
- Improve our development processes and suggest best practices.

Skills and Qualifications

Requirements:

- Professional experience in PHP web development (experience with Symfony framework is highly advantageous).
- Comfortable with our front-end technology stack (Vue.js/Nuxt, webpack, HTML5, CSS3).
- Mastery of OO design patterns.
- Solid understanding of testing, continuous development and deployment practices.
- A desire to collaborate with and mentor other team members.
- A passion for writing clean code and keeping up with the latest technologies.

Bonus points:

- You have built and maintained a large-scale software product.
- You have experience in Payment Processing or Banking industry.
- You have experience with Blockchain technologies.

- You've created software following agile development practices.

We offer

- Exciting and challenging work in fast developing company.
- Friendly and supportive team.
- Nice and cozy office in the center of Riga.
- Unique and trending digital and crypto currency industry.
- Competitive salary and bonuses.
